- **Backend Development:** PHP (Laravel), API Development, MVC Architecture, Ajax, Cron Job, Beginner in Node.js (Express)
 - **Frontend Development:** JavaScript, jQuery, HTML5
 - **Database Management:** MySQL, MongoDB(intermediate)
 - **E-commerce Integration:** BigCommerce API, Webhooks
 - **Version Control & Tools:** Git, Windows, Linux, FTP, Postman, Ngrok, ChatGPT, VS Code
-

EXPERIENCE

Bliss Web Solution Pvt. Ltd.

07-July-2021 - 16-Sep-2024

Php(Laravel) Development

Throughout my career, I have worked on diverse projects leveraging the Laravel framework. My expertise includes the following:

- **Laravel Development:** Successfully developed and maintained multiple web applications, ensuring high performance and scalability.
- **BigCommerce API and Webhooks:** Proficient in integrating BigCommerce API and webhooks to enhance e-commerce functionality and automate workflows.

Projects:

Drywallsurgen

- Led the development of a mobile app for Drywall Surgeon using Laravel, MySQL, JWT tokens, and Stripe. The app improved service efficiency by 30% by enabling users to upload damage photos for quote generation. Enhanced customer satisfaction through streamlined repair service management.

Guaranteed Offer

- Created a mobile application with Laravel, MySQL, JWT tokens, and API integration. The platform offers homeowners instant property offers, simplifying the selling process and reducing the time and hassle associated with traditional real estate transactions.

The International Advertising Association (IAA)

- Created mobile and web applications using Laravel and MySQL, leveraging APIs for enhanced functionality. The platform provides growth and connectivity tools for brands and marketers through thought leadership, education, and professional development programs.

b2bsummit iaaglobal org

- Developed a web application using Laravel, MySQL, and Stripe to connect industry leaders and foster collaboration. The platform serves as a hub for networking, knowledge exchange, and sharing insights on the latest business trends and technologies.

Affricarising iaaglobal org

- Developed a web application using Laravel, MySQL, and Stripe to promote sustainable development and empower communities across Africa. The platform connects local initiatives with global resources, fostering collaboration and knowledge sharing.

Photogear

- Created a web application using Laravel and MySQL for BigCommerce, catering to photography enthusiasts. The platform offers a wide selection of photography gear, expert reviews, and insightful articles, helping photographers enhance their skills and make informed purchasing decisions.

Atlanticelectrics

- Developed a comprehensive product synchronization system for BigCommerce using Laravel and MySQL. Ensured real-time updates and efficient product information management through BigCommerce webhooks, enhancing operational efficiency.

WoodUnderwear

- Migrated an existing BigCommerce store from v2 to v3 using Laravel and MySQL. Ensured data integrity and provided a seamless user experience throughout the transition.

Gogenlab

- Created a web application to streamline product management for BigCommerce using Laravel and MySQL. Developed a custom third-party admin interface to enhance synchronization and data handling, improving operational efficiency.

Node.js Development

Node.js, Express, and MongoDB: Applied these technologies to build robust back-end systems and manage databases efficiently, improving the overall functionality and performance of applications.

Project:

QuizTool

- Quiztool is an internal project developing for knowledge transfer, utilizing Node.js for backend functionality and React.js for frontend presentation. It facilitates quiz-based learning and question management within the organization, enhancing knowledge dissemination and engagement.
